

MINISTER FOR FINANCE & ECONOMIC DEVELOPMENT'S SPEAKING NOTES

DETAILS OF REVENUE MEASURES FOR 2026 and 2027

Honourable Members of Finance Committee, Governments do not introduce revenue measures lightly. Governments, by nature, prefer to create the conditions for growth and opportunity rather than to impose additional financial obligations.

However, responsible fiscal management requires us to face realities head-on and make measured, sometimes difficult, choices to protect the Country's long-term financial health.

In recent years, Honourable Members, the Country has faced growing fiscal pressures - from rising global inflation, increased costs of critical infrastructure needs, and the expansion of public service demands.

It is against this backdrop that the Government has carefully reviewed the balance between revenues and expenditures, and determined that targeted, well-designed revenue adjustments are necessary to ensure the continued delivery of essential services and the sustainability of our public finances.

Honourable Members, before finalising the new revenue measures, the Government engaged in discussions with stakeholders, especially those in the financial services industry. We listened carefully to their feedback and made adjustments where appropriate to ensure that the measures are realistic, proportionate, and do not compromise Cayman's competitiveness as a leading international financial centre.

This collaborative approach reflects our ongoing commitment to partnership, transparency, and maintaining confidence in our fiscal and regulatory environment.

Honourable Members, for the upcoming Budget, the Government has introduced new revenue measures in 2026 and 2027. These measures are carefully designed to strengthen our fiscal position, maintain compliance with the Framework of Fiscal Responsibility and reduce the risk of future deficits as global economic pressures and local demands continue to rise.

Honourable Members, details of the revenue measures are as follows:

1. **Bank and Trust Licenses** increases will yield an additional \$1.9 million in 2026 and \$3.25 million in 2027:

Honourable Members, the vast majority of the new revenue measures that I just outlined are not intended to put further burden on the ordinary Caymanian. They are primarily concentrated in areas where the economic activity and capacity to absorb such costs are strongest - in particular, within the large, internationally focused segments of our economy. In addition, with respect to some of the fee increases mentioned in the commerce space, there is ongoing stakeholder consultation so they are not hard and fast and are therefore subject to adjustment, either up or down.

At the same time, Honourable Members, these new revenues are sustainable and ensure that the needs of our people are being met – that the Government

continues to invest in the infrastructure, healthcare, education, housing, and public safety services that directly benefit our people.

Honourable Members, these decisions are not about raising revenue for its own sake; they are about maintaining balance - between growth and responsibility, between opportunity and sustainability. The Government remains firmly committed to fiscal prudence, transparency, and fairness in everything we do.

Thank you, Honourable Members.
